

Resolved: Known Issue - KI9.2-145_BP – Direct Edits to Proposed Budget Cause Out of Sync Budget Amounts

UPDATED: April 7, 2021

STATUS: Resolved

RESOLUTION: ITS modified code on the Update Personal Services page to correctly update the Proposed Budget field on all tabs. Additionally, to handle instances where the values are out of sync, new code was added to sync the two values when users save the page after updating the Proposed Budget field.

NAVIGATION: Navigator > BOR Menus > BOR Budget Prep > Budget Prep Data Update > Personal Services

ISSUE: If users made direct edits to the Proposed Budget field on the Budget tab of the Update Personal Services page, then these direct edits caused the Proposed Budget field to not match between the Budget tab and the New Distrib tab. This in turn, caused the Fringe Update process to incorrectly calculate the Health and Life fringes splits.
