

## Learning Outcomes for Area F Mathematics Degrees 2011

These are not subject to external approval, but are for internal use by the committee, and for posting on the USG site. We settled these in our Feb. 2011 meeting (Item 23). They are:

- a) Students will demonstrate the ability to model and solve problems using knowledge and techniques of multivariate Calculus.
- b) Students will demonstrate sufficient knowledge in mathematics or related fields for entry into upper division courses in mathematics.
